

Daily Safety Meeting – Complacency on the Job

Today's Topic: Complacency — The Silent Killer

The Risk: Overconfidence and routine lead to missed hazards and preventable accidents.

What Goes Wrong: Skipping steps, not paying attention, trusting equipment blindly, and losing awareness.

Real Problem: Experience without discipline leads to carelessness.

Why It Matters: One mistake can cause injury, damage, or worse.

How to Stay Safe: Stay alert, double-check work, respect the job, and never assume it's safe.

Final Thought: The moment you think it can't happen to you is when it usually does.
