

Daily Safety Meeting – Working Around Livestock

Today's Topic: Livestock Safety — Respect the Animal

The Risk: Animals can spook, kick, or react unpredictably at any time.

What Goes Wrong: Standing in blind spots, moving too fast, not reading behavior, getting too comfortable.

Real Problem: Underestimating animals and losing awareness.

Why It Matters: One bad interaction can cause serious injury or stress the herd.

How to Stay Safe: Stay aware of position, avoid blind spots, move calmly, watch body language, give space.

Final Thought: Respect the animal, respect the space, and you'll walk away safe.
